

JOHN HILL

A Five Way Junction

Sitting on a battery, like chickens in a hatchery
All things electric taken over by AI
Silently manoeuvring - pigs begin to fly
Vehicles symmetrically, laid out in calm array
Conversing online circuitry to verify emergency
Semi-conductors set to rule the world
Walk tall or crawl, prepare for all contingency
Don't rock the boat if you intend to stay afloat

Living in a multiverse of metaphor and vagary
Reality is virtual, disinformation hazy
Synonymous subtraction, fake and bizarre
Adware, malware, a virus to send you crazy
You need to know the facts? Go to a factory
Think you've been hacked? Consult an actuary
When words fall into line they're coinciding
It's more about the rhythm, than the rhyming

Multi-story car parks with tales of need for reinforcement
Clean air zones that future dreams are made of
Driverless cars with dispensary bars and TV stars
Solar panels and windmill farms - the new pollution?
No more use for the Highway Code
Delivery drones making way for a new evolution
Look out for the count. Prepare to dismount
No two flakes reach identical confusion
